Refrigerant	R32	GWP		675
Refrigerant leaka	age contributes to clim	ate change.	Refri	gerant with lower global warming potential (GWP) would
contribute less to	global warming than	a refrigeran	t with	higher GWP, if leaked to the atmosphere. This
appliance contair	ns a refrigerant fluid w	ith a GWP e	equal t	o 675. This means that if 1kg of this refrigerant fluid
	-		-	I warming would be 675 times higher than 1kg of CO2,
