

Indoor unit model name SRR25ZS-W, SRR60ZS-W Outdoor unit model name SCM71ZS-W

Refrigerant R32 GWP 675 Refrigerant leakage contributes to climate change. Refrigerant with lower global warming potential (GWP) would contribute less to global warming than a refrigerant with higher GWP, if leaked to the atmosphere. This appliance contains a refrigerant fluid tha GWP equal to 675. This means that if 14g of this refrigerant fluid would be leaked to the atmosphere, the impact on global warming would be 675 times higher than 1kg of CO2, over a period of 100 years. Never try to interfere with the refrigerant circuit yourself or disassemble the product yourself and always ask a professional.
