

Indoor unit model name SRR35ZS-W, SRR60ZS-W Outdoor unit model name SCM71ZS-W

Refrigerant       R32       GWP       675         Refrigerant       leakage contributes to climate change. Refrigerant with higher GWP, if leaked to the atmosphere. This appliance contains a refrigerant fluid with a GWP equal to 675. This means that if kg of this refrigerant fluid would be leaked to the atmosphere, the impact on global warming would be 675 times higher than 1kg of CO2, over a period of 100 years. Never try to interfere with the refrigerant circuit yourself or disassemble the product yourself and always ask a professional.         Cooling mode       SEER       6.2         Energy efficiency class       A++         Design load (Pdesignc)       7.1 kW         Energy consumption       401 kWh per year based on standard test results. Actual energy consumption will depend on how the appliance is used and where it is located.
