Refrigerant	R32	GWP		675
contribute less to appliance contai would be leaked over a period of	o global warming than ns a refrigerant fluid w to the atmosphere, th	a refrigerant with a GWP e e impact on p interfere w	t with h equal to global	erant with lower global warming potential (GWP) would higher GWP, if leaked to the atmosphere. This o 675. This means that if 1kg of this refrigerant fluid warming would be 675 times higher than 1kg of CO2, refrigerant circuit yourself or disassemble the product
