| Refrigerant leal | kage contributes to clin | nate change. | Refrig | erant with lower global warming potential (GWP) would |
| contribute less to global warming than a refrigerant with higher GWP, if leaked to the atmosphere. This | | | | |
| appliance contains a refrigerant fluid with a GWP equal to 675. This means that if 1kg of this refrigerant fluid | | | | |
| would be leaked to the atmosphere, the impact on global warming would be 675 times higher than 1kg of CO2, | | | | |
| over a period of 100 years. Never try to interfere with the refrigerant circuit yourself or disassemble the product | | | | |
| yourself and alv | ways ask a professiona | ıl. | | |
